

Ishara Wickramasinghe
Colombo, Sri Lanka
Backend Software Engineer

SUMMARY

Backend engineer with over a decade of experience building and operating production services. Comfortable owning a system end to end, from data modelling through deployment and on-call.

EDUCATION

BSc (Hons) Computer Science, University of Moratuwa, 2013

SKILLS

Node.js, Docker, PostgreSQL, Redis, Kubernetes, MongoDB, Terraform, GraphQL, TypeScript, CI/CD

WORK EXPERIENCE

Senior Backend Engineer, Zephyr Logistics, 2016-01 - Present

Lead a team of four building the shipment-tracking platform. Designed the core Node.js services that sit in front of a PostgreSQL primary and a Redis cache layer for hot reads. Migrated the deployment target from bare VMs to Kubernetes, cutting release time from forty minutes to six. Introduced Terraform to manage every environment from a single source of truth instead of hand-clicked infrastructure. Own the GraphQL gateway that fronts the service mesh for internal clients.

Backend Engineer, Colombo Data Systems, 2013-06 - 2015-12

Built and maintained a document-processing pipeline. Owned the MongoDB cluster storing parsed documents and the ingestion service written in Node.js. Containerised the existing deployment with Docker as part of a platform modernisation project.
